

ROLE DESCRIPTION

MWApp Port Coordinator

The project's local point of contact in your port — a staff member or volunteer from your centre, accredited by IMWIRSA.

The MWApp Port Coordinator is the person who keeps the port's information accurate and current inside MWApp. They act as the main point of contact between the local seafarers' centre and every seafarer using the app during a port call.

Core Responsibilities

- **Keep the Port Card current** — transport, opening hours, medical and safety information. Today this happens through a structured questionnaire; a simple Telegram bot for quick updates is in development.
- **Respond to update requests** — correct outdated information reported by seafarers or IMWIRSA staff.
- **Act as first point of contact** — the named, reachable person a seafarer can turn to for help in that port.
- **Send urgent notices** — a planned feature to push time-sensitive alerts to seafarers currently in port.
- **Join network meetings** — participate in periodic international IMWIRSA coordinator community calls.

Who can be a coordinator

Any staff member or volunteer at a partner seafarers' centre, accredited by IMWIRSA after onboarding.

What's required

A working phone number and email. Today's registration is a structured questionnaire; the Telegram bot for later updates is coming soon.

Recognition

Certificate, optional stipend, training, and priority access to new features.

Initial registration

45–60 min

One-time, via the structured port questionnaire. Ongoing updates take a few minutes each and currently go through IMWIRSA's editorial team while the update bot is being built.

Recognition Options

- **A. Status & recognition** — official IMWIRSA certificate, named page on the platform, reference letter, private coordinator community access.
- **B. Financial support** — where budget allows, a monthly stipend (€50–150 depending on port size/activity), covered connectivity costs, annual "Coordinator of the Year" award.
- **C. Organisational growth** — free promotion of the centre, access to IMWIRSA grant programmes, staff training, priority feature access.

How to Get Started

Your centre's leadership nominates a coordinator candidate → IMWIRSA sends a pre-filled draft and instructions for your port → the coordinator verifies the details and submits the questionnaire (about 45–60 minutes) → the port goes live on MWApp.
