

ROLE DESCRIPTION

Port Welfare Manager (PWM)

The project's ambassador in your port — a staff member or volunteer from your centre, officially accredited by IMWIRSA.

The Port Welfare Manager is the person who keeps IMWIRSA's Global Maritime Welfare Platform accurate and alive for a specific port. They act as the main point of contact between the local seafarers' centre and every seafarer using MWApp during a port call.

Core Responsibilities

- **Keep the Port Card current** — transport, opening hours, medical and safety info — via a simple Telegram bot (no new software to learn).
- **Respond to update requests** — correct outdated information reported by seafarers or IMWIRSA staff.
- **Act as first point of contact** — the named, reachable person a seafarer can turn to for help in that port.
- **Send urgent notices** — push time-sensitive alerts to seafarers currently in port when needed.
- **Join network meetings** — participate in periodic international IMWIRSA PWM community calls.

Who can be a PWM

Any staff member or volunteer at a partner seafarers' centre, accredited by IMWIRSA after onboarding.

What's required

A smartphone with Telegram — the bot walks through registration and every update.

Recognition

Certificate, optional stipend, training, and priority access to new features.

Typical weekly time commitment

15-20 min / week

Recognition Options

- **A. Status & recognition** — official IMWIRSA certificate, named page on the platform, reference letter, private PWM community access.
- **B. Financial support** — where budget allows, a monthly stipend (€50-150 depending on port size/activity), covered connectivity costs, annual "Best PWM" award.
- **C. Organisational growth** — free promotion of the centre, access to IMWIRSA grant programmes, staff training, priority feature access.

How to Get Started

Your centre's leadership nominates a PWM candidate → IMWIRSA runs a short onboarding call and registration via the Telegram bot (15-25 minutes) → the port goes live on MWApp.
